Most Utah hospitals in this table had about as many deaths as expected compared to similar hospitals in the U.S. One Utah hospital had fewer than expected. No hospital had more than expected.

[See additional hospitals that treated at least one patient but less than 30 patients.](#)

[Learn about Primary Stroke Centers and Telestroke Facilities.](#)

[View Data Limitations.](#)

Rating: based on the Exact 95% Confidence Interval test of statistical significance, except hospitals with no deaths from 2004 through 2006 have three stars.

* * * Fewer deaths than expected (better)	* * Same as expected	* More deaths than expected
---	----------------------	-----------------------------

Actual deaths: percentage of patients who received care for this condition or procedure and died in this hospital.

Expected deaths: percentage of patients who were expected to die at this hospital if it performed the same as other U.S. hospitals that treated similar patients (age, gender, how ill the patients were).

Table Legend

< 5 = 1 to 4 patients

State average hospital length of stay

Minor/Moderate is 2.9 days

Major/Extreme is 4.6 days.

[Learn about Primary Stroke Centers and Telestroke Facilities.](#)

[View Data Limitations.](#)

Level of Illness: Compared to patients with minor/moderate level of illness, patients with major/extreme level of illness are likely to have more serious conditions that require more complex treatment.

Average Charge: The average dollars for hospital services for which patients were billed at a particular hospital. The charge does not include physicians' professional fees or patient personal costs.
